## **Management Information System of *Kudumbashree* - Learning from collection and Analysis of data**

As the recipient of the Kerala State E-Governance Award for the year 2010, Kudumbashree MIS have set a significant mile stone in the evolution of Kudumbashree. Data collected from across the length and breadth of Kerala and entered in the MIS, hence Kerala in the broad view is available for analysis. Plan/Project preparation and execution greatly depends on these data. Not only Kudumbashree but also other departments rely on these data for the same. Kudumbashree MIS is taken as model for the development of NRLM MIS for National Rural Livelihood Mission (NRLM).

The Management Information System of Kudumbashree Mission is being used by Community Development Societies (CDSs), District Missions and State Mission for monitoring and planning of various programs associated. The data uploaded onto the online MIS includes personal details of 41 lakh women members of Kudumbashree NHGs, monthly thrift and credit behavior of 2.6 lakh NHGs, loan particulars of all live loans in all branches of all banks where there are Kudumbashree accounts, details of all farming groups, micro enterprises, Balasabhas as well as particulars of Ashraya families and the benefits accruing to them. In a sense it would provide a record of actual benefits accruing to the poor through Kudumbashree. This data is regularly updated – in the case of thrift and credit, on a monthly basis. Reports generated from the database enable monitoring and evaluation of Kudumbashree activities up to the ward level.
