Kudumbashree got opportunity to take up some construction activities of Smart City, Trivandrum

We elaborated about the women construction groups functioning under the leadership of Kudumbashree in ‘Making an Impact’ Article - 02. Hope you all will recall the ‘Making an Impact’ Article - 81 and ‘Making an Impact’ Article - 195, in which we explained about some big scale house construction works undertaken by Kudumbashree construction groups. Kudumbashree construction groups are getting more opportunities to function extensively. The opportunity received as part of the Thiruvananthapuram Smart City Project is the latest among these.

Kudumbashree units got an opportunity to construct three different works of the Thiruvananthapuram Smart City project. The Smart City officials provided the work to Kudumbashree Construction groups, once the work could not be awarded to bidders as no one took the works. Our teams received this responsibility wholeheartedly. The three works undertaken by Kudumbashree are given below:

1. Construction of the Interactive Information Kiosks at Corporation premises and Gandhi Park (Rs 6.66 lakhs)

2. Renovation of the toilets at KSRTC Bus Station, Thampanoor (Rs 7.3 lakhs)

3. Construction of rain water harvesting system at Corporation premises and Women’s College, Thiruvananthapuram (Rs 61 lakhs)

Kudumbashree received these construction activities two months ago. We could successfully complete the first task (interactive information kiosk). The construction
activities of the second task is progressing. The design and schedules of work for the rain water harvesting system is ready now. Various works would be finished by our construction groups in time with utmost quality. Hope our construction groups will progress to greater heights by taking up such challenging opportunities.
