Join our Skill Training Programmes

Deen Dayal Upadhyay Grameen Kaushalya Yojana (DDUGKY) is the project being implemented through Kudumbashree with central-state partnership (60% Central share and 40% State share). By implementing this programme, we were able to provide opportunities for 65,449 students to get skill training. They were trained in various courses and received the certificates approved by Sector Skill Council. Placement offers were received for 41,605 students in various companies during the period of 2016 to 2020. Kudumbashree has been receiving the National Awards for the excellence in the execution of the programme for the last three consecutive years.

Yuva Keralam is the programme conceptualised in the same model by the Government of Kerala for extending skill training for 10,000 students. Yuvakeralam is funded by the Rebuild Kerala Initiative. As part of this programme, approval was given for extending skill training to 10,000 students under the leadership of 40 training agencies. In the first phase, we will start skill training course to 2000 students before 15 February 2021.

The training programmes were temporarily stopped for the last one year on the background of Covid-19 pandemic. Four months ago, we had received the approval to restart the training classes and we have started continuing the training of the DDUGKY programme. Also we started the training courses of Yuva Keralam. In the first phase, we are trying to complete the training of the batches, whose course was temporarily stopped due to covid-19 pandemic. Training of 103 batches out of the 178 DDUGKY batches have been restarted now. There are courses of three, six, nine months duration. Training of 129 batches is progressing now.
From this week onwards, we are starting a campaign for enrolling the students who are interested in skill training for the upcoming batches. The enrollment for the DDUGKY programme will be done through Kaushal Panjee App/portal and the enrollment for the Yuva Keralam programme will be done through CDS Registration. Through these programmes students would get a great opportunity to receive skill training in the interested sectors. So, I request all those who are interested to become part of this campaign and register in Kudumbashree. Interested students may make their registrations through Kaushal Panjee app or CDDs, during the two weeks from 8-22 February 2021. For the upcoming training's, we will select students from those who register. They will get opportunity to get trained in the preferred sectors when the next batch will be started. So for those who are interested in doing the courses the registration in this initial phase is important.

The web portal https://kaushalpanjee.nic.in/ddugky/home.html or the Kaushal Panjee mobile Application could be used to complete the registrations. Else, students may contact Kudumbashree CDS office in the respective LSGIs. Through these programmes, opportunity is received for getting trained in various courses such as Artificial Intelligence, Junior Software Developer, Airline Reservation Agent, CCTV Installation etc. from among others.
