Covid-19 Academy; Special Training of National Disaster Management Authority for Kudumbashree members

National Disaster Management Authority (NDMA) has entrusted ‘Sphere India’ for organising covid-19 countering, awareness programmes in all states and union territories across the country. Under the leadership of Sphere India, covid awareness training in connection with Covid-19 disaster management is being extended to Civil Defence Volunteers and Volunteer Organisation volunteers etc in the name of Covid-19 Academy. On knowing about this, we decided to make the office bearers of Kudumbashree three tier organisational system, Kudumbashree officials and all those who are part of Kudumbashree intervening in the covid-19 countering activities of Kerala, part of this training programme.

Kudumbashree District Mission Coordinators, Assistant District Mission Coordinators, Programme Managers, Block Coordinators, office bearers of CDS, ADS and NHG, Accountants, Community Counsellors, Tribal Animators, Coastal Volunteers, KAASS and Training team would take part in the training programme that was officially launched today. The online training would be conducted as a 11 day programme.

The classes will be organised on specific dates till 21 October, on the topics such as risk communication, security of the covid frontline warriors, Gender- Gender mainstream and Addressing Gender based Violence in Humanitarian Action, Mental
Health and the Social-Mental issues during covid, The role and responsibilities of CBO including Kudumbashree Organisational System in covid countering activities, Disaster Management Plan (State- District- Local Self Government Institution) State Policy, Security of School Students, Sustainable Development Aims, Climate Change, Sendai FrameWork for Disaster Risk Reduction and Disability Inclusive Disaster Risk Reduction.

Kudumbashree had played a key role in covid countering activities associated with the State Disaster Management Authority. We hope that through Covid 19 Academy Classes, we would be able to give more scientific training to those who have experience in field level.
