Hope you all would have happened to know about the grocery kits being supplied by Government of Kerala to 87 lakh families as part of Covid-19 counteracting activities. Through Civil Supplies Department, actions for packing and distributing the grocery kits with 17 items have already been started in all districts in Kerala.

The packing of these kits are progressing in around 1000 depots in Kerala under the leadership of Supplyco (civil supplies department). Kudumbashree members are involved in packing these grocery kits. The food items needed to a particular locality is brought to the most safe spot by the officials and the products are packed in kits from there. Kudumbashree members are volunteering in the service of packing the groceries in the kits at the godowns. They are packing the kits under the supervision of supplyco. The process is carried out by observing all the Covid-19 protocol.

As per the statistic till 11 April, 105
CDSs (Community Development Society of Kudumbashree) from 14 districts across the state are involved in this activity. In total, 569 Kudumbashree members are engaged in grocery kit packing. We are happy that, our team got an opportunity to be a part of this group activity in which the government is trying to ensure the food security of its people through the Civil Supplies Department. In the upcoming days, if needed, more Kudumbashree volunteers would join to become part of these activities coordinated by Civil Supplies Department.
