GIS Mapping of DDUGKY training centres

DDUGKY (Deen Dayal Upadhyay Grameen Kaushalya Yojana) is one of our flagship scheme that provide skill training and placement to the youth who are in search of jobs. The training in various courses in DDUGKY is given through 112 Programme Implementing Agencies (PIAs). The courses are of 3 months to 12 months duration and are accredited and certified by the Sector Skill Council (SSC). The courses are available in 27 various sectors viz., IT, Electrical, Retail, Banking, Tourism-Hospitality, Food Processing etc. Kudumbashree is extending training in 126 different courses (in these 27 sectors).
We have mapped the location and details of all the agencies who are providing training (in Kerala) through Geographic Information Mapping System. By clicking at this link, http://kudumbashreegis.online/ the location details of the training agencies that extend skill training through Kudumbashree would be available. A click on each pinned location (location of agencies), photos, details of the courses being extended and the contact details for getting enrolled to the training would be available.

By giving the details of all agencies through GIS mapping platform, we hope that it would be useful for the students to know more about different courses and training centres in Kerala. In addition to this, the details of the courses available are provided in this page: http://www.kudumbashree.org/pages/366. Those who are interested may contact the respective District Mission team or at the number available at the GIS Map. We hope via this activity, everyone be able to get trainee and placed for desirable job by way of DDUGKY through Kudumbashree.
