Special assistance for increasing placements @ DDUGKY

Today also I am writing details about innovations in the DDUGKY skill training programme being implemented through Kudumbashree. As part of DDUGKY, 55,350 students were provided with skill training and the details regarding the same was mentioned in articles ‘Making an Impact’ - 04, ‘Making an Impact’ - 60 and ‘Making an Impact’ - 164. Our team is getting ready to impart skill training to 34,000 students also.

Skill training is being extended in 126 courses in 27 sectors like electrical, retail, banking, tourism-hospitality, software, food processing etc. The training is done for courses which are of duration ranging from 2 months to
1 year. Cost of training is met by government.

Those who successfully complete the course would get the certificate endorsed by Sector Skill Council (SSC). The training is imparted through skill training agencies. Activities are progressing in the field to provide placements to maximum number of students who successfully complete the training and pass in the examinations.

In addition to that, special activities are also carried out under the leadership of Kudumbashree to ensure more job placements for the students. This is done when the companies directly make requests to Kudumbashree. Today’s article is on such interventions.

Reliance Communications had came forward informing that they are ready to give job to students who successfully completed training through DDUGKY. Reliance suggested that they are ready to give job to those students who hadn't received any job placements yet.

Our team accepted this suggestion and we organised special placement drives at 15 different locations in the state. Through this, we were able to ensure job placements for 245 students. Likewise, our team is ready to extend needed help to those companies who would come forward to give job to the students who are trained in various courses in specific sectors.

In addition to Reliance Communications, 16 students have secured job placements at IT Mission and Learners India as well. We have already started special placement drives for various companies. Those companies who wish to know more details about identifying the best candidates for specific sectors may contact Shibu N.P (8157830774) or K.R Jayan (9995120123).
