Even you can ‘Monitor’

At Kudumbashree, our team is striving to bring in revolutionary changes in the society by developing novel policies and programs. I am writing this ‘Making an Impact’ article series to share our experiences, new opportunities and knowledge that we acquired through implementing various projects. Our aim is to spread these developmental communication to more people and to identify more opportunities of convergence for Kudumbashree Mission’s activities. The details and progress of the programmes we referred until now are all in this monitoring system, in the public domain so that people can analyse own their own. Let me write about it today.
Kudumbashree Mission has been implementing about 200 different projects. We give the annual target of each programme to our district teams during the month of April and they give back the monthly developments through the monitoring tables in our website. These development tables are visible to all in the website. We could see different coloured buttons at the right hand side of Kudumbashree website - www.kudumbashree.org and while browsing in mobiles, buttons could be viewed as a list.

Out of these buttons, you may click in the ‘Monitor Progress’ Button. On clicking, 15 tabs of different sectors would be visible. All can view the progress of various programmes dealt by Kudumbashree in these tabs and the public may analyse it. One may click at the heading of each column to view the list in the ascending or descending order. Through this we may analyse which district is performing well, which district needs improvement etc.

We try to keep up the transparency through this.

I welcome you all to view the table which mark the developments of the programmes.

(http://www.kudumbashree.org/monitor progress) If you click in this page, you could directly reach the monitor progress page.

If it seems difficult to understand the official details, the progress cards dealing with the monthly development of the main 127 programmes are also given in this link - (http://www.kudumbashree.org/progresscard)

Through this, you may be able to get the accurate detail. Other than this, there are a lot more information and detail in our website, which is one of the best in government sector. Hope you all may visit our website to explore further
