Samahta Green is a plant situated at Kunnamkulam Thrissur. It is run by the Kudumbashree members. The plant started working on 18th October 2016.

1. When did the plant started working?
   - The Samatha Green plant started working on 18th October 2016.

2. How is the plant working?
   - The plant is working in conjunction with the IRTC (Indian Rural Technology Centre). IRTC provided the technology, machines, and skills. IRTC helped us move the proposal to the table of IRTC. They helped us in this project. With the help of Municipality Parishath Members, the members are making the waste to manure project.

3. What about the members who working in the plant?
   - There are six Kudumbashree members working in the plant. They are Shajan, Smt. Emily Baby, Smt. Rama Pramod, Smt. Sherly, Smt. Mini Varghese, and Smt. Sheeba Subrahmanyan.

4. What about the product and customers?
   - We are producing 15 kg of manure a day. We are charging Rs 15 per kilogram. The manure is moving well. Native Agriculture Offices are the main customers. Educational institutions, individuals, associations, offices, etc., are visiting the plant for study. They are also buying the manure. Native Agriculture Officers are the main customers. They happened to know about the Samatha Green from the society. They are now buying our manure. Institutions, corporates, colleges, individuals, etc., are also buying the manure. We have packages of 1 Kg and 40 Kg.

5. What about the income generated?
   - We are generating a sustainable income.

6. What is the source of the waste?
   - The waste is collected from the trenching ground near the Kunnamkulam municipality. The trenching ground is facing many issues.

7. What is the process of turning waste into manure?
   - While the waste is being collected, it is stirred and then moved to the hemp. Hemp is then moved into the machine. The hemp waste is then dried in the machine. The dried hemp is then mixed with Enakkulam and coir powder. After ten days, it is received as manure. The manure is packed and sold.

8. Is the manure being used?
   - Yes, the manure is being packed. We are selling it to educational institutions, individuals, associations, offices, etc., for study. They are also buying the manure. Native Agriculture Officers are the main customers. They happened to know about the Samatha Green from the society. They are now buying our manure. Institutions, corporates, colleges, individuals, etc., are also buying the manure. We have packages of 1 Kg and 40 Kg.

9. What about the future?
   - We aim to extend the idea of waste to manure to other places in Thrissur and other towns in Kerala. Our long-term goal is to implement this plant in all towns in Kerala.
