A campaign was organised under the leadership of Haritha Keralam Mission for converting the Government offices and Public Sector undertakings into ‘Green’ Offices. On 26 January 2021, a total of 11,163 offices in Kerala was declared as ‘Green’ Offices. We are so happy that out of them 308 are Kudumbashree offices. 298 CDS Offices, 9 District Offices and 1 Snehiha Gender Help Desk of Kudumbashree has now turned ‘Green’.

Offices which avoided disposable plastics, used only reusable and recyclable items for meeting the day to day activities of the office are selected as Green Offices. These offices make several arrangements such as banning of disposable plastics, arranging eco-friendly plates, removing old furnitures and e-wastes, installation of waste bins for segregating bio-degradable and non bio degradable wastes, creating organic vegetable farms and gardens in the available spaces, making the canteen and lunch room ‘green’ etc. They also made arrangements for optimum use of water, for saving electricity, for making the office dust free and also for arranging adequate wash room facilities as well. After that, the ‘Green Audit’ Inspection team visited these offices based on the report submitted by the respective head of the institutions. It is after reviewing the system, the selected offices were declared ‘Green’. When Haritha Keralam Mission took the initiative for turning our government offices and public sector undertakings into green offices, our CDSs took it as an opportunity to improve the office and systems. Appreciations to all CDS Office bearers who took leadership for the same. We consider it as a great achievement that, out of the 1024 CDS offices, 298 offices have now turned ‘Green’. Hope, other offices will also make efforts to turn their offices ‘Green’, by getting inspired from this achievement. In addition to the CDS offices, 9 Kudumbashree District Mission
offices and Snehitha Gender Help Desk at Wayanad have now turned 'Green'. Appreciations to all Kudumbashree units who came forward to become part of such an operation to make the mission 'Green Kerala' possible.
